PROFILE

IT professional with hands-on experience in system implementation, business analysis, and software development. Currently working as an Implementation Consultant at DataOn, delivering HRIS solutions tailored to enterprise client needs. Experienced in bridging technical and business functions from gathering requirements and conducting gap analysis to configuring systems and training end-users. Adept at managing cross-functional stakeholders and ensuring implementations meet quality and timeline standards.

WORK EXPERIENCES

Implementation Consultant at DataOn (PT Indodev Niaga Internet)
February 2025 – Present

- Successfully delivered and contributed to 10+ HRIS implementation projects across diverse industries including financial services, banking, manufacturing, and HR outsourcing firms.
- Implemented and customized DataOn's HRIS product to meet client-specific business requirements, including backend and frontend development using ColdFusion (Lucee), React.js, Golang, and MariaDB.
- Conducted gap analysis between client needs and standard product capabilities, translating findings into actionable functional solutions.
- Prepared UAT documentation and performed testing to validate that implementations met agreed requirements.
- Provided post-go-live support including issue resolution, system improvements, and end-user training.

Business Partnership at Techade.id (PT Tekadkan Mimpi Indonesia)
December 2025 – Present

- Responsible for introducing techade.id and its products to potential clients or partners.
- Attend events to represent techade.id to expand the company's network.
